

Capybara Enclosure Activity

After watching our facebook live videos we hope you have a better understanding of the care that we give to our animals. Now it's your turn!

What you need:

- Chalk
- Open Space

Directions:

Watch the facebook live videos and pay close attention to what we have in each animal's enclosure. Notice how each animal's space is different based on what that animal needs and where it would live in the wild. Use these observations to create your own zoo!

Concepts:

- Connection- what do animals need, animal care
- Fine motor skills- drawing

What to say:

- What animal is this for?
- Where does that animal live in the wild?
 - Is it hot or cold there?
 - Wet or dry?
- How does this animal like to move?
 - Could we add anything in that would help them do that?
- What do they eat?
- Where can they get their water?
- How would the zookeeper take care of them?
- Where would they sleep?
